Our COVID-19 preventive measures

In response to the declaration of a state of emergency for Tokyo, Fukuoka and five other prefectures, we have decided to ask all our employees to work from home until May 6 to limit spread of COVID-19.

This restrictive measure is to ensure the safety of our clients, communities and employees, which is our primary concern.

We are committed to keeping our services up and running even under the circumstances. Please call direct lines to reach out to your representatives. Your call will be forwarded to their cell phones.

We deeply appreciate your patience as we react to this global issue, and thank you for your support in returning to business as usual as quickly as possible.
